

Ageing Luxembourg

SCRIPT DATA 2

STATEC Hackathon 2025

36%

Goal: give users insights into their own communities and help policy makers

Research from WHO shows that loneliness increases risks of dementia, depression, and physical decline. (https://www.who.int/teams/social-determinants-of-health/demographic-change-and-healthy-ageing/social-isolation-and-loneliness?utm_source=chatgpt.com)

Dashboard

**Data does not just measure isolation –
it helps build connections**
